

Typical Applications

- Rack server
- High density server
 - High frequency server
- GPU server
 - Computer cooling
 - Thermal management, laser cooling and medical equipment

Features

- 50,000 hours long working life
- Ultra efficient, low power consumption
- No leakage, more reliable
- Continuous duty
- Variable speed
- Super quiet

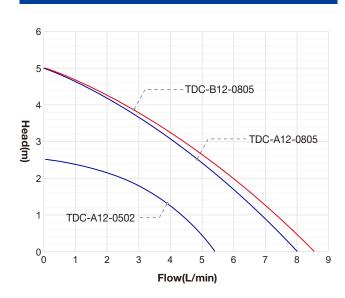

Specification

Model	Product Code	Rated Voltage (VDC)	Max Water Flow (L/min)	Max Water Head (M)	Rated Current (A)	Rated Power (W)
TDC	TDC-A12-0502	12	5.4	2.5	0.46	5.5
	TDC-A12-0805	12	8.5	5	1.32	15.8
	TDC-B12-0805	12	8	5	1.35	16.2
Standard configuration: 1. /PWM or /5V speed control 2. FG (RPM) signal wire 3. LHE-4PConnector						

- The data in the table is the measured performance when pure water is delivered at normal temperature.
- The maximum flow rate is the flow rate when water head is 0 meter, and the highest lift is the lift when water flow is 0 L/min.
- · Working mode: Continuous
- · Noise: ≤37dB(A)

- IP level: IP54
- · Coil Insulation class: Class F
- Ambient temperature: -40°C ~40°C • Liquid temperature: -40°C ~70°C
- Do Not Run Pumps Dry.
- · Pumps must be in a continuous flooded suction environment.
